

Anna Park

Web Developer | Design Engineer

Vancouver, BC | +1 (778) 939-6191 | annapark0828@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Github](#)

KEY COMPETENCIES

Languages	TypeScript, JavaScript, HTML, CSS, Python, Java
Frameworks & Libraries	React, Next.js, Tailwind CSS
Tools & Platforms	Webflow, Git, GitHub, Vercel, Figma

WORK EXPERIENCE

Product & Service Designer Intern | CareerMind

08/2025 - 07/2026

- Designed and improved information delivery for program partners and participants,
- Created HTML/CSS, pre-requisite learning content, hands-on projects and facilitated workshops
- Curated curriculum, learning and project resources, coordinated mentor-participant communications

Bestbuy Canada | Product Advisor

10/2025 - 12/2025

- Simplified technical plans into clear, tailored options based on customer needs and budget.
- Quickly mastered telecom products and internal systems in a fast-paced retail environment.
- Exceeded sales targets during peak periods by completing 15+ mobile activations per day across major Canadian carriers.

Software Engineer Intern | Electronics and Telecommunications Research Institute

01/2024 - 03/2024

- Developed frontend features and backend infrastructure for an AI-powered customer support system,
- Reduced GIS Android application loading time by 60% by optimizing the onMapReady
- Conducted field testing in live 5G environments and used ADB and Logcat to identify usability issues, contributing UI/UX improvements that were incorporated into the production application.

PROJECT EXPERIENCE

Full-Stack | Next.js, TypeScript, Tailwind CSS, Beehiiv API, Vercel

Built a responsive website that translates business goals and existing branding and improves user experience.

- Migrated from Beehiiv's template system to a custom Next.js + Tailwind build while preserving the client's complete newsletter archive through API integration.
- Developed an independent website integrated with the Beehiiv API, allowing the client to continue managing newsletter publications while maintaining a fully customizable website.
- Deployed a production-ready website on Vercel with a scalable and maintainable codebase.

Webflow | Webflow, CMS, Figma, Scalable Design

Built a fictional high-end sunglasses e-commerce brand based in Vancouver

- Six-page responsive e-commerce website for desktop, tablet, and mobile.
- Enables clients to add, edit, and organize products without modifying the website layout or code.
- Designed scalable CMS collections for product management, allowing new products to be published directly through the CMS.

Mobile App | React Native, TypeScript, Expo and Figma

A local-first AI-assisted task management application that transforms natural-language plans into daily schedules.

- Designed user journey, including wireframes and interfaces that simplify task planning and scheduling
- Implementation of the MVP using React Native and TypeScript with a focus on usability and offline-first functionality.
- AI generates a personalized schedule based on each user's lifestyle, which can be reviewed and adjusted before being saved locally.

ACADEMIC QUALIFICATIONS

Post Degree Diploma | UI/UX Design - Cornerstone College, Vancouver, BC

Jun 2025 ~ Dec 2025

Bachelor's Degree | Information Engineering - Chungbuk National University, Korea

Nov 2025

Full Stack	Webflow	Mobile App
Next.js, TypeScript, Tailwind CSS, Beehiiv API, Vercel	Webflow, CMS, E-Commerce, Figma, Scalable Design	React Native, TypeScript, Expo, Figma
• A client project over four weeks, translating business goals into a redesigned website. • Built a responsive website using Next.js and TypeScript with reusable, component-based architecture. • Integrated the Beehiiv API to dynamically display newsletter content while allowing the client to continue managing publications independently through Beehiiv. • Deployed the production-ready website on Vercel with a maintainable and scalable codebase.	• Designed and developed a responsive e-commerce website in Webflow from concept to launch. • Built a scalable CMS structure that enables non-technical users to manage products without modifying layouts or code. • Designed six user-centered pages with a strong focus on information architecture, usability, and visual consistency. • Optimized responsive layouts to deliver a seamless experience across desktop, tablet, and mobile devices.	• Designed a local-first AI-assisted task management application that transforms natural-language plans into structured daily schedules. • Created user flows, wireframes, and interface designs to simplify task planning and scheduling. • Collaborated on the implementation of the MVP using React Native and TypeScript with a focus on usability and offline-first functionality.
